OUR PENSIONS OFFERING

Why choose us?

We understand the wide range of information and advice you need to navigate today's environment. We are at the leading edge of innovation in pensions law and practice.

Our long-standing clients include many of the UK's largest pension funds as well as major employers, and we have partnered and guided them through change after change. We keep track of what's on the horizon and engage with policy makers and industry players. This enables our clients to predict and manage new risks and opportunities with confidence.

Pensions is a highly complex and technical field and the financial risks are significant. Clients need to know that their advisers have the right experience and expertise and won't compromise on quality. But we understand that you also need advice that delivers real value – practical and commercially strategic solutions, provided in a straightforward and efficient way. And you need advisers who are as committed to your goals as you are.

This is the combination that we provide. We have one of the largest pensions practices in the City, and pensions clients are priority clients across our firm. We seamlessly encompass all the technical legal specialisms you need across a range of specialist lawyers who are themselves leaders in their fields. We ensure that you get the clear answers and options you need to help you to predict and plan for the future of pension provision.

As an independent law firm, we work closely with carefully chosen overseas law firms who share our specialist strengths and very demanding quality standards. This approach benefits our clients, allowing us to select the best lawyers for the job in each location.
